

INMARTECH 2025

7-9 OCTOBER 2025

National
Oceanography
Centre

WORKSHOP OBJECTIVES AND KEY THEMES

Collaborative Knowledge Exchange

INMARTECH 2025 facilitates collaboration between marine technicians and researchers to share technical insights and operational experiences.

Cutting Edge Innovations

The workshop showcases innovations in oceanographic instruments and vessel operations to advance marine technology

Key Technology Themes

Focus areas include vessels, autonomous vehicles, in situ systems, sampling, sensors, continuous underway monitoring, digital ocean and in-house technical solutions.

- Over 50 attendees
- Mainly from the Europe but with registrations from AUS and NZ too
- Diverse programme of talks
- Networking
- Snazzy dinner

ABSTRACT SUBMISSION AND PARTICIPATION

Call for Abstracts

INMARTECH 2025 invites all abstracts to be submitted by Friday 26 September for presentations and workshops.

Presentations will last 15-20 minutes, and presenters gaining opportunities to share innovations, engage with peers, receive feedback and influence marine technology.
